Postup (Ubuntu 12.04)

Postup je stejný, jen se musí upravit makefile po „naklonování“ repozitáře:

```
cd DVB-Realtek-RTL2832U-2.2.2-10tuner-
mod_kernel-3.0.0/RTL2832-2.2.2_kernel-3.0.0/
```

Otevřeme v textovém editoru [Gedit](#):

```
gedit Makefile
```

A upravíme řádek 7 z

```
INCLUDE_EXTRA_DVB := include-300
```

na

```
#INCLUDE_EXTRA_DVB := include-300
```

a řádek 10 z

```
#INCLUDE_EXTRA_DVB := include-320
```

na

```
INCLUDE_EXTRA_DVB := include-320
```

Uložíme a pokračujeme od příkazu

```
make clean
```
